

EDUCATION

Macquarie University, Australia

Ph.D. in Computer Science

Mar. 2021 – Mar. 2024

Macquarie University, Australia

M.Res. in Computer Science, Grade: 93/100

Jan. 2019 – Dec. 2019

Southwest University, China

B.E. in Computer Science, GPA: 3.71/4.00

Sep. 2014 – Jun. 2018

RESEARCH INTERESTS

• Graph Mining • Graph Neural Networks • Deep Learning • Anomaly Detection • Social Computing

RESEARCH PROJECT

Early Prediction in Large-scale Time-variant Information Networks

Jan. 2020 – present

Research Assistant - advised by Dr. Jia Wu, Research Director, AI-enabled Processes Research Centre, Macquarie University

- Project supported by the Australian Research Council (ARC)'s Discovery Early Career Research Award (DECRA, DE200100964) (\$427,068)
- Working on **developing novel and efficient technologies to detect anomalies such as abnormal items, relationships, and groups in information networks**, which will help to safeguard Australian business, industry, and society from cyberfraud, online rumour-mongering, and financial loss.

Trust Evaluation and Spam Detection on Online Social Networks

Jan. 2019 – Dec. 2021

Research Assistant - advised by Dr. Jia Wu, Research Director, AI-enabled Processes Research Centre, Macquarie University, and Dr. Surya Nepal, Senior Principal Research Scientist, & Group Leader, Distributed Systems Security, CSIRO's Data61

- Project supported by Macquarie University Co-funding with CSIRO's Data61 (\$592,000)
- Working on **the analysis of complex interactions among people on dynamic social networks**, supporting the trust evaluation of information and people available on online social networks, facing the challenges in terms of accuracy, relevancy, and consistency.

Network-Oriented Data Analysis, Mining and Optimization

Apr. 2016 – Jun. 2018

Research Assistant - advised by Prof. Chao Gao, Northwestern Polytechnical University

- Project supported by Fundamental Research Funds for the Central Universities (No. XDJK2016A008) (¥200,000)
- Working on **designing advanced algorithms applied to network community detection and network diffusion analysis**.

RESEARCH INTERNSHIP

Graph-based Anomaly Detection in E-commerce Scenarios

Jun. 2020 – Dec. 2020

Research Intern at Alibaba Group - advised by Dr. Zhao Li, Director, Web Data Mining Lab at Alibaba-Zhejiang University Joint Institute of Frontier Technologies

- Working on **designing an efficient anomaly detection platform to discover groups of fraudsters conduct fraud events (e.g., insurance fraud and fraudulent transactions) in e-commerce scenarios**, which will help regulators take measures for targeted control and safeguard e-commerce industry from financial loss caused by fraud.

POPULAR REPOSITORY

- **Awesome-Deep-Community-Detection** (150+ Stars & 50+ Forks)
A collection of papers, datasets, and implementations on deep learning for community detection

SCHOLARSHIPS & AWARDS

- | | |
|----------------------------------------------------------------------------------------------|-----------------------|
| • International Macquarie University Research Excellence Scholarship, Macquarie University | 2019–2024 |
| • Higher Degree Research Rising Star, School of Computing, Macquarie University | May 2022 |
| • Most Influential IJCAI Papers (<i>Ranked 4th</i> in 2020) | Feb. 2022 |
| • Executive Dean’s Commendation for Academic Excellence, Macquarie University | Apr. 2020 |
| • <u>Student Travel Award of IJCNN</u> | Jul. 2019 |
| • First Prize of Excellent Undergraduate Scholarship, Southwest University (<i>Top 3%</i>) | Dec. 2016 & Dec. 2017 |

¹The conference and journal rankings are maintained by the Computing Research and Education Association of Australasia (**CORE**), which assesses major conferences and journals in the computing disciplines.
